

World Trade Center Moscow
INTERNATIONAL CONGRESS "ARCHITECTURE-2021"
September 21, 2021, 10.00-10.30 – Registration

Congress hall: CIVILIZATION & BIOSPHERE
10.30-12.00 Plenary session

The conflict between human civilization and Nature has existed almost always; attention has been paid to this even in antiquity. Now the conflict has become global and threatens the very existence of mankind. A large number of studies, publications and actions of governments and international organizations are devoted to this problem. This conflict today concerns everyone, it is most acute and makes us recognize the problem as not distant, but urgent, which is directly related to urban planning and construction. The impact of Civilization on the Biosphere and Nature has a global scale and manifests itself in many ways. The values of our Civilization can be lost forever!

Congress hall: TERRITORIAL DEVELOPMENT STRATEGY
12.30-16.00 Conference

Strategic business game: Our cities are not a factory for work and living, the city is filled with the breath of public gardens, squares, parks, streets and highways. They all have their own rhythm, their own energy, are saturated with different emotions and feelings, endowed with their own special cultural codes. We invite you to feel, hear and see our cities in a new way. In the strategic business game of the collective mind, we will try from all angles to get acquainted with the participants of the Congress-2021, who will present their position in five main sectors ": yellow, white, red, green, blue.

A series of presentations and strategic cases: OFFLINE and ONLINE THE PROGRAM was prepared taking into account the main objectives: presentation of modern trends in the field of public-private partnership formats with an emphasis on the social and creative cluster, which will become a new step in the formation of investment attractiveness of territories and the creation of successful international consortia.

Online center: MONUMENTALITÀ & MODERNITÀ-2021

12.00-18.00 Scientific conference in memory of Raphael Dayanov

The kaleidoscopic variety of modern trends does not fit into the textbook "history of styles" and requires new approaches to the analysis of the latest architecture. Outstanding researcher of the Russian avant-garde S.O. Khan-Magomedov put forward in 2010 in his last book "Ivan Zholtovsky" the thesis about the confrontation in the twentieth century of two superstyles in architecture: classics and modernism. Now the first quarter of the 21st century is coming to an end: how does the idea of two superstyles compare with the latest processes, on the one hand, and a millennial architectural history, on the other? We invite the participants to go beyond the usual "styles" in search of more general patterns of architecture development.
